FIRST TELLURIUM CORP.
(formerly Deer Horn Capital Inc.)
NOTES TO THE FINANCIAL STATEMENTS
For the six months ended January 31, 2022

NOTE 1 - NATURE OF OPERATIONS AND GOING CONCERN

First Tellurium Corp. (formerly "Deer Horn Capital Inc.") ("First Tellurium" or the "Company") was incorporated under the *Business Corporations Act* (Canada) and continued into British Columbia pursuant to the *Business Corporations Act* (British Columbia, Canada). The Company's head office and principal place of business is 381 – 1440 Garden Place, Delta, British Columbia, Canada. The Company is a reporting issuer in the provinces of British Columbia, Alberta and Ontario, Canada and trades on the Canadian Securities Exchange under the symbol "FTEL". The Company owns interests in exploration and evaluation assets in British Columbia and its principal business is the exploration of those assets.

These financial statements are prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business in the foreseeable future. Management believes that the Company's working capital at October 31, 2021, is not sufficient to finance operations through the next twelve months. The Company has incurred ongoing losses and has a shareholders' deficiency. The Company's ability to continue on a going concern basis depends on its ability to successfully raise additional financing. While the Company has been successful in the past in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms acceptable to the Company. These material uncertainties may cast significant doubt upon the Company's ability to continue as a going concern. These financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or ability to raise funds.

NOTE 2 – BASIS OF PRESENTATION

Statement of compliance

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). The policies applied in these financial statements are based on the IFRS issued and outstanding as at the date the Board of Directors approved these financial statements for issue.

These unaudited condensed interim financial statements should be read in conjunction with the most recently issued annual audited financial statements of the Company, which include information necessary or useful to understanding the Company's business and financial statement presentation. In particular, the Company's significant accounting policies were presented as Note 3 to the financial statements for the year ended July 31, 2021 and have been consistently applied in the preparation of these unaudited condensed interim financial statements.

NOTE 8 – EXPLORATION AND EVALUATION ASSETS *(continued)*

Colorado Klondike property

During fiscal 2021, the Company entered into an option agreement to acquire a 100% interest in the Colorado Klondike property, located in south-central Colorado, USA, from Colorado Klondike LLC. The terms of the agreement include consideration for an aggregate US\$260,000 (approximately US\$50,000 per year) cash and the incurrence of an aggregate US\$300,000 in exploration expenditures on the property within five years, at which time the option may be fully exercised upon an additional payment of US\$1,200,000, or the higher real estate appraised value, to a maximum of US\$1,500,000. Upon full exercise of the option Colorado Klondike LLC will retain a 3% NSR, with the Company reserving the right to buy-back a 1% NSR for consideration of US\$1,000,000. The Company will also be required to pay an advance royalty payment of US\$60,000 per annum commencing on the first anniversary of the exercise of the option. The Company has paid an initial US\$50,000 (\$63,770) to the Optionor.

NOTE 9 – INVESTMENT IN ASSOCIATED COMPANIES

The Company has a 49% investment in two private companies, Cheona Metals Inc. and Cheona Health Inc., which are classified as long-term investments. As the Company owns a 49% interest in each entity and maintains significant influence, but not control, the Company accounts for these investments under the equity method.

NOTE 11 – LOANS PAYABLE

In fiscal 2016 the Company issued debenture loans in the principal amount of \$182,000. The loans bear an annual interest rate of 10% and mature on March 2, 2021. The Company recorded interest expense of \$18,155 (2018 - \$18,350) in relation to the accrued interest on the debenture loans and is included in accounts payable and accrued liabilities.

In fiscal 2018, the Company made the required interest payments under the loan agreements, however the Company has not received a waiver of the previous breach of terms, accordingly, the loans are presented as current. Interest payments for the further periods remain outstanding. The Company is therefore currently in default for interest payments due.

In fiscal 2022, the Company received other unsecured loans of \$27,000, which have been repaid in full.

NOTE 12 – SHARE CAPITAL *(continued)*

c) Share-based compensation: (continued)

The fair value of each option granted to employees, officers and directors was estimated on the date of grant using the Black-Scholes option pricing model.

Fiscal 2022

During the period ended October 31, 2021, the Company recorded \$147,327 in share based compensation pursuant to options granted.

The fair value of 850,000 options granted on October 4, 2021 with an exercise price of \$0.11 was determined using a risk free interest rate of 0.02%, an expected volatility of 180%, an expected life of ten years and an expected dividend rate of zero, resulting in a fair value of \$84,622 or \$0.11 per option.

During fiscal 2021, the Company settled related party debt of \$50,000 by way of issuance of units with a fair value of \$124,277, resulting in a loss on settlement of debt of \$74,277. The terms of the units and measurement of compensatory warrants are described in Note 13.

NOTE 14 – SEGMENTED INFORMATION

The Company operates in one business segment being the acquisition and exploration of exploration and evaluation assets in Canada and the United States, as described in note 8. The total assets attributable to the geographical locations relate primarily to equipment and reclamation deposits in Canada.

NOTE 15 – FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Classification of financial instruments

Financial instruments measured at fair value are classified into one of three levels using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value (“FV”) hierarchy has the following levels:

Level 1- quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2- inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (ie. as prices) or indirectly (ie. derived from prices); and

Level 3- inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company’s financial instruments consist of cash, receivables, reclamation deposit, accounts payable and accrued liabilities, loans payable and due to related parties.

Fair values

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

The fair value of cash is measured at Level 1 of the fair value hierarchy. The carrying value of receivables, reclamation deposit, accounts payable and accrued liabilities, loans payable and due to related parties approximate their fair value because of the short term nature of these instruments.

Financial instrument risk exposure and risk management

The Board of Directors has overall responsibility for the establishment and oversight of the Company’s risk management framework. The Company considers the fluctuations of financial markets and seeks to minimize potential adverse effects on financial performance. The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management process.

Credit risk

Credit risk is the risk of a financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligation. The Company’s exposure to credit risk includes cash, receivables and deposits. The Company reduces its credit risk by maintaining its bank accounts at large international financial institutions. The Company’s receivables consist primarily of tax receivables due from federal government agencies. The maximum exposure to credit risk is equal to the fair value or carrying value of the financial assets.

NOTE 15 – FINANCIAL INSTRUMENTS AND RISK MANAGEMENT *(continued)*

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances or debt financings. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments. The Company is exposed to liquidity risk.

Interest rate risk

The Company has cash balances and debt. The Company's current policy is to invest excess cash in investment grade short-term demand deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit rating of its banks. The Company is marginally exposed to interest rate risk.

Foreign currency risk

The Company is not exposed to foreign currency risk.

Commodity price risk

The Company is nominally exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

NOTE 16 – CAPITAL MANAGEMENT

The Company manages common shares, stock options, and share purchase warrants as capital. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets, or adjust the amount of cash on hand.

In order to facilitate the management of its capital requirements, the Company prepares expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions.

The Company does not pay out dividends at this time. The Company's investment policy is to keep its cash treasury on deposit in an interest bearing Canadian chartered bank account. Cash consists of cash on hand, balances with banks and investments in highly liquid instruments, if any. The Company considers all highly liquid instruments with maturity of three months or less at the time of issuance to be cash equivalents as the fair value approximates carrying value. There have been no changes to the Company's approach to capital management during the period ended October 31, 2021. The Company is not subject to externally imposed capital requirements.
